

CLARO AI VIDEO ANALYTICS SCHOOL SAFETY BUNDLE

Boost campus security by incorporating advanced intelligence into existing video infrastructures.

CHALLENGE

Schools and city leaders in the U.S. are facing challenges in creating a safe learning environment for students due to increasing costs for security measures. Despite spending \$2 billion on security procedures and protocols in 2022, school safety remains a pressing issue. Concerns extend beyond violence, including bullying, extreme weather, theft, and vandalism, which all put students at risk.

SOLUTION

Advanced Artificial Intelligence (AI) technologies can quickly analyze and report on campus video footage to help locate, track, and isolate threats in real-time, providing school personnel situational awareness with accurate information to respond efficiently.

The Claro AI Video Analytics platform provides advanced AI analytics to new/existing IP-enabled security cameras, detecting potential threats such as weapons, smoke/fire, unauthorized access, and objects left behind. It supports real-time and forensic analytics (from recorded video) and applies multiple capabilities to a single camera without the added cost of dedicated solutions.

THE CLARO AI VIDEO ANALYTICS SCHOOL BUNDLE

Total package bundles for **11 cameras** include:

- **Claro AI Video Analytics Desktop Server and Core Platform Software**
- **AI Object Detection and Video Search** for up to 8 cameras
- **AI Face Detection and Facial Recognition** for up to 1 camera
- **AI Intrusion Detection / Weapons Detection / Fire Detection** for up to 2 cameras

One Time Charge: **\$2,500**

Monthly Recurring Charge: **\$367** for **36** months
