Claro AI Video Analytics

20+ Years of Global Business Experience Presence in 26 Countries

Pro-Active Monitoring Using AI Video Analytics

Forensic Analysis in Seconds Instead of Days

24/7 Intrusion Alerts and Threat Assessment

Features | Benefits

Extensible Search Capabilities:
Monitor when employees are wearing safety equipment, staff are complying with mask mandates, and search for people and objects based on specific attributes.

Intrusion Detection:
Detect unauthorized access, including drone activity within your business perimeter.

Facial Recognition/Search:
Gain automatic simultaneous recognition of multiple faces in one video frame/image.

Weapons Detection:
Detect intrusions including dangerous weapons and receive real-time alerts.

Vehicle/License Plate Recognition:
Search for specific car models/colors and send alerts for license plates and unauthorized vehicles.

Product Description

Monitor suspicious activity and manage everyday tasks using Claro AI Video Analytics' Machine Learning and Artificial Intelligence. Help increase safety and maintain better records of real-time or recorded video while leveraging Machine Learning. Receive alerts when unauthorized personnel, vehicles, or even weapons enter your perimeter, and use CES' extensible search capabilities to locate people and objects based on specific characteristics (e.g., clothing color, age, etc.). Detect conditions on real-time video streams or do forensic analysis on pre-recorded video.

Why Claro Enterprise Solutions

Using CES's network, organizations can augment their video surveillance with Artificial Intelligence and Machine Learning on a specialized server with extra computing power that leverages GPUs.
